DETAILED ACTION

1. Claims 1-15 are presented for examination.

Reasons for Allowance

2. Claims 1-15 are allowed.

The following is an examiner's statement of reasons for allowance:

Claims 1-15 include allowable subject matter since the prior art made of record and considered pertinent to the applicant's disclosure does not teach or suggest the claimed limitations. Nakagawa et al. (U.S. Patent No. 6,064,592), and others, does not teach the claimed invention having a method of programming a non-volatile memory comprising floating the local bit line, and inputting a first source line voltage to the source line for increasing a voltage difference between the control gate of the k^{th} cell transistor and the buried local bit line through capacitance coupling between the buried local bit line and the source line, wherein the voltage difference is used to adjust an amount of electrons stored on the floating gate of the k^{th} cell transistor for programming the k^{th} cell transistor.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thong Q. Le whose telephone number is 571-272-1783. The examiner can normally be reached on 8:00am-5:00pm M-F.
